

JOHN MOORE & SONS

Builders Limited

THE COMPLETE BUILDING SERVICE

Family-owned building company John Moore & Sons is currently refurbishing The Coniston Hotel near Skipton. The project is revealing how they offer the complete building service.

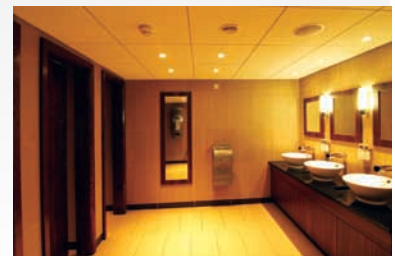

The photographs clearly show how the vision is becoming a reality. Phase one of the building work at The Coniston Hotel was completed on schedule in just 12 weeks and Ribble Valley-based builders, John Moore & Sons, are now well on with phase two.

The first phase included all external works, the construction of a new entrance and reception, a new restaurant extension, the new Huntsman's Lodge overlooking the lake, new toilets, kitchens and a lift.

“The work has to be done with maximum professionalism and minimal fuss”

In the first two weeks of the project 24,000 tonnes of earth had to be moved to reduce levels and open up the stunning views of the lake. What's more, all this had to be done with maximum professionalism and minimal fuss. *“The hotel has remained open throughout and every effort has been made to cause as little disruption to guests and wedding parties alike,”* said John. *“The site has been kept immaculate and the works as hidden as possible.”*

The refurbishment of the existing restaurant and bar was completed in record time, closing on a Sunday evening and opening just one week later! Also underway the construction of a new treatment plant for the whole hotel. Phase two now involves the construction of 22 new bedrooms and the work remains on-schedule.
